

CHANDA VENKATESH

Full Stack Developer | Node.js | MERN | TypeScript

+91 8463944069 | venkateshvinky3803@gmail.com | Nirmal, Telangana | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full Stack Developer with **2+ years of experience** building enterprise ERP applications using **Node.js, Express.js, React.js, Next.js, TypeScript**, and **MongoDB**. Skilled in designing secure REST APIs, optimizing performance with **Redis** and **BullMQ**, and delivering production-ready Purchase, Quality, and Sales & Inventory modules.

Professional Experience

Full Stack Developer

Aug 2024 – Present

Sharpminds Cloud Tech Pvt Ltd (Remote)

- ▶ Developed and maintained enterprise-grade **Purchase, Quality, and Sales & Inventory Management** modules for a production ERP platform using **Node.js, Express.js, Next.js, React.js, MongoDB, and TypeScript**.
- ▶ Owned end-to-end development of the **Purchase Management** workflow including **Purchase Requests, RFQs, Vendor Quotations, Purchase Orders**, item management, and multi-level approval workflows.
- ▶ Built scalable and reusable **REST APIs** for ERP modules, following modular architecture and clean coding practices to improve maintainability and scalability.
- ▶ Designed and implemented the **Quality Management** module supporting incoming, in-process, and final inspections with complete quality traceability, rejection handling, and automated replacement **GRN (Goods Receipt Note)** creation.
- ▶ Developed **Sales & Inventory Management** features including stock movement, inventory tracking, stock reconciliation, sales order processing, and inventory reporting to support daily business operations.
- ▶ Improved backend performance by implementing **Redis caching** for frequently accessed master data and business reports, reducing redundant database queries and significantly improving API response times.
- ▶ Implemented asynchronous background job processing using **BullMQ** with Redis for scheduled reminders, notification delivery, report generation, and long-running ERP operations, improving overall application responsiveness.
- ▶ Optimized complex **MongoDB** queries and aggregation pipelines to improve data retrieval performance for inventory and reporting modules.
- ▶ Collaborated closely with product managers, QA engineers, and developers to convert business requirements into scalable production-ready features while participating in sprint planning, code reviews, and production deployments.
- ▶ Debugged and resolved production issues by identifying bottlenecks, optimizing APIs, and ensuring data consistency across ERP workflows.
- ▶ Wrote clean, strongly typed, reusable **TypeScript** code following best practices, reducing maintenance effort and improving code quality across shared modules.
- ▶ Contributed to improving application reliability through continuous bug fixes, feature enhancements, API optimization, and backend performance improvements.

Projects

Crowdfunding Platform

React.js | Node.js | Express.js | MongoDB | REST APIs

- ▶ Developed a full-stack crowdfunding platform enabling users to create, manage, and contribute to fundraising campaigns.
- ▶ Designed secure **REST APIs** using Node.js and Express.js for authentication, campaign management, and contribution workflows.
- ▶ Implemented complete user authentication, authorization, campaign CRUD operations, and responsive user interfaces using React.js.
- ▶ Designed optimized MongoDB collections and backend architecture to efficiently manage users, campaigns, and contribution records.

- Built a complete e-commerce platform featuring product browsing, advanced search, category filtering, shopping cart, and checkout functionality.
- Implemented centralized application state management using **Redux Toolkit** to provide predictable and scalable state updates.
- Developed reusable React components and integrated REST APIs for product catalog, cart management, and order processing.
- Designed responsive UI with optimized user experience across desktop and mobile devices.

Technical Skills

Languages	JavaScript, TypeScript
Frontend	React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, Redis, BullMQ, JWT Authentication
Databases	MongoDB, Redis
Developer Tools	Git, GitHub, Docker, Postman, VS Code
Core Competencies	ERP Development, Backend Performance Optimization, API Design, Redis Caching, Queue Management, Authentication, Authorization, Production Support, Database Optimization, RESTful Services, Agile Development

Certifications

- Full Stack Development Bootcamp (JavaScript) — upGrad

Education

Bachelor of Technology (Civil Engineering)
Mahaveer Institute of Science and Technology
Hyderabad, Telangana
